Internal view of the Pathology Perineum showing carcinoma (left) and polyp (right)
Clinical Male Pelvic Trainer Mk 2

**Advanced** Part No: 60951
**Standard** Part No: 60950

The Clinical Male Pelvic Trainer Mk 2 presents key anatomical features, both externally and internally, for teaching ‘hands-on’ male pelvic examination and diagnosis. The uncluttered design of the model enables trainees to focus on essential anatomy and procedure. The Mk 2 model features new and improved pathologies which allow for a realistic and anatomically accurate training experience. This product has been designed in close collaboration with the staff at the Clinical Skills Resource Centre, University of Liverpool; Imperial College, London; Guys Hospital, London; Southmead Hospital, Bristol; University of Southampton, UK.

**Skills**
- Learning examination procedure
- Testicular examination
- Dry catheterisation (Foley catheter size 16 and retrograde catheters)
- Examination of normal anatomy
- Evaluate testicular abnormalities
- Evaluate abdominal / pelvic pain

**Features**
- The genitalia includes the penis (both circumcised and non-circumcised), scrotum, testicles (includes vas deferens and epididymis)
- Anatomy of penis:
  - glans and shaft normal
- Anatomy of groin with clear anatomical landmarks:
  - ASIS (anterior superior iliac spine)
  - pubic symphysis and tubercles
- Anatomy of scrotum area:
  - scrotum
  - testicles with epididymis and vas deferens
- Pathologies of genital area (Advanced model only):
  - varicocele (Module 2)
  - testicular tumour & penile cancer (Module 3)
  - epididymal cysts (Module 4)
  - hydrocele (Module 5)
  - orchitis/epididymo-orchitis (Module 6)
  - indirect Inguinal hernia (Module 7)
- Can be used in two positions (standing and supine)
- Soft tissue inserts are removable and replaceable:
  - genitals (penis, perineum, & testicles)
  - abdominal wall
- Skin surface is washable using soap and water

**Package supplied** Part No
