AirSim Advance
Part No: TCAA91100
with Breakout Teeth
Part No: TCAA91101
The addition of a ‘real-feel’ skin covering provides a more realistic bag & mask ventilation training experience, and an improved neck design allows for accurate articulation.

Skills
- Training in/use of:
  - bag & mask ventilation
  - full range of supraglottic devices
  - video laryngoscopy
  - standard laryngoscopy
  - tracheal intubation
  - naso-tracheal intubation
  - awake fiberoptic examination

Features
- Anatomically accurate nasal passage
- Inflatable tongue to increase difficulty

Package supplied
- 1 AirSim Advance model
- 1 user manual CD
- 1 lung bag
- 1 carry case

Packed weight (kg) & dimensions (mm)
3.5 kg 460 l 260 w 330 h

AirSim Advance Bronchi
with Bronchial Tree
Part No: TCAA95100
with Bronchial Tree & Breakout Teeth
Part No: TCAA95101
The AirSim Advance Bronchi is next generation of the AirSim family of products which provides anatomically correct detail down to the fourth bronchi branch.

Skills
- Training in/use of:
  - endo-tracheal intubation
  - naso-tracheal intubation
  - diagnostic bronchoscopy
  - lung isolation techniques
  - lung suctioning techniques
  - single and double lumen tubes and bronchial blockers
  - specialised bronchial stents

Features
- ‘Real-feel’ skin covering

Package supplied
- 1 AirSim Advance model
- 1 user manual CD
- 1 carry case

Packed weight (kg) & dimensions (mm)
3.9 kg 460 l 260 w 330 h

AirSim Advance Crico
with Bronchial Tree & Breakout Teeth
Part No: TCCR95101
The Advance Crico combines all of the standard features of the Advance product with the addition of a simulated cricoid cartilage to facilitate training in both needle and surgical cricothyroidotomy procedures.

Skills
- Training in/use of:
  - needle and surgical cricothyroidotomy
  - awake fiberoptic examination
  - tracheal intubation
  - naso-tracheal intubation
  - video and standard laryngoscopy including Sellick Manoeuvre
  - full range of supraglottic devices
  - bag & mask ventilation

Features
- ‘Real-feel’ skin covering

Package supplied
- 1 AirSim Advance model
- 1 user manual CD
- 1 carry case

Packed weight (kg) & dimensions (mm)
3.9 kg 460 l 260 w 330 h
Cricoid Stick Trainer

Part No: LD261-01001

Needle and surgical cricothyotomy skills can be practised on this trainer.

Skills
• Needle cricothyotomy
• Surgical cricothyotomy

Features
• Anatomically accurate landmarks for site training
• Interchangeable tracheas facilitate realistic simulation of cricothyrotomy procedures
• Self-repairing neck skin allows for repeated practise
• Trainer is designed to fit with a range of adult manikins

Package supplied
• 1 Replaceable Trachea - Rigid LD261-01150
• 1 Replaceable Trachea - Soft LD261-01250
• 1 Replacement Neck Skin LD261-01350
• 1 cricoid stick head
• 1 balloon lung
• 1 retaining band
• 1 base

Difficult Airway Management Simulator Training Model

Part No: KKMW13

The Difficult Airway Management Simulator offers excellent realism in airway management training and also various challenges for trainees through a combination of controllable degree of mouth opening, changeable limit of neck flexibility and an inflatable tongue.

The product provides wide variations of training experiences in difficult airway management including the use of diverse types of devices. Its portable design and durable structure allow training in emergency, pre hospital, and clinical settings.

Skills
• Airway opening techniques (head tilt, jaw thrust)
• Bag-Valve-Mask ventilation
• See product page on website for full details

Features
• 24 variations (including one normal case) of settings which include: 2 steps of neck flexibility, 3 steps of mouth opening, 2 sizes of tongues, 2 positions of vocal cords
• Robust structure and the stable base for training in various settings including those for pre-hospital scenario
• See product page on website for full details

Package supplied
• 1 Torso manikin
• 3 Upper incisions
• 1 Lubricant
