Packed weight (kg) & dimensions (mm)
2.3 kg 210 l 320 w 45 h

Seymour II Wound Care Model™
Part No: VTA0910
Based on an elderly patient, this model aids in the identification and assessment of wounds. Once the different aetiologies are understood, this model can be used to discuss and devise treatment plans.

Skills
- Wound assessment (classification and staging)
- Wound cleansing
- Dressing techniques
- Measurement of wound length, depth, undermining, and tunnelling
- Negative pressure wound therapy

Features
- Positioning of wounds permits multiple dressings
- Wounds and complications include:
  - Stage I left ischial pressure ulcer
  - Stage II left ischial pressure ulcer
  - Stage III right trochantic pressure ulcer, infected
  - Stage IV sacral pressure ulcer with slough, undermining, tunnelling, sinus tract, and exposed bone
- Visit the product web page for more information
