Conducting a thorough and detailed physical examination is a fundamental skill for all medical undergraduates, nurses and allied healthcare practitioners. The range offered is designed to help healthcare professionals develop and maintain their examination expertise. A full range of task trainers allows for individual, team, and hybrid simulation opportunities that facilitate knowledge, skill retention and confidence.

Examination & Diagnostic Breast Trainer

Part No: 40044
A life-size realistic breast used for training in examination procedure & diagnostic techniques.

Skills Gained:
- Recognised clinical breast examination technique
- Diagnosis of pathologies:
  - carcinoma
  - fibroadenoma
- Aspiration of a cyst
- Self-examination technique

Product Qualities:
- Breast is warm to the touch
- Skin surface is washable using soap & water
- Lightweight & compact base allows for:
  - self-examination (when held up against chest)
  - table top presentation
- Simulated carcinoma & fibroadenoma
- Benign cyst for aspiration

You’ll Receive:
- 40040 1 Examination & Diagnostic Breast
- 40106 1 Breast Aspirant (50ml)
- 1 Rigid Two-Part Plastic Base

Breast Examination Trainer - Advanced, Standard & Basic

Part No:
- 40201 Advanced
- 40200 Standard
- 40202 Basic

This product provides a realistic platform for acquiring the delicate skills required for Clinical Breast Examination (CBE). Consisting of realistic soft tissue, with the versatility of interchangeable pathologies, it can be used either as a bench top teaching aid, or worn by a simulated patient during student assessment. An ideal product for any undergraduate programme running OSCEs, or healthcare professionals promoting best practice diagnostic skills to trainees & patients.

This product has been designed in close collaboration with Mr Peter Donnelly of Torbay Hospital, UK. With the help & advice of staff at the Clinical Skills Resource Centre, University of Liverpool & the Clinical Practice Centre, St James’s University Hospital, Leeds.

Skills Gained:
- Clinical breast examination techniques (CBE & SBE)
- Professional-to-patient communication
- Identification of anatomical landmarks & lymph nodes (axillary, supra & infraclavicular)
- Location & diagnosis of pathologies

Packed weight (kg) & dimensions (mm) 1.25 kg 320 l 270 w 140 h
Female Examination • Breast

- Simulated carcinoma & fibroadenoma
- Benign cyst for aspiration
- Pathologies supplied: carcinomas: 2cm, 3cm, 5cm, cyst, fibrocystic disease, fibroadenoma

Product Qualities:
- Soft tissue looks & feels realistic
- Soft tissue breasts, with clavicular & axilla pads for lymph node placement
- Comfortable to wear for long periods of time during OSCEs
- Easy for the user to fit & remove
- Pathologies can be placed in various predetermined location points & are easily changeable
- Dual purpose product: bench top & hybrid use
- Hard torso available for bench top use
- All components are latex free

Clinical Female Pelvic Trainer (CFPT) Mk 3
- Advanced & Standard

**Part No:**
- 60905 Advanced
- 60900 Standard

The CFPT Mk 3 presents an accurate anatomical and tactile representation of the female pelvis for hands-on examination and diagnosis of pathologies and abnormalities. It can be used for many levels of training from undergraduate onwards, as well as family health.

**Skills Gained:**
- Recognition of perineal and pelvic anatomy including bony landmarks
- Digital vaginal examination
- Bi-manual examination
- Cervical smear procedure (including use of speculum)
- Digital rectal examination

- Advanced model comes with interchangeable uterine modules with different complications
- Anus and lower bowel is present in all Modules

**Product Qualities**
- Abdominal wall with fat layer makes palpation more realistic
- Labia can be parted realistically
- Partial thighs aid anatomical orientation
- Each uterus is presented at the correct anatomical angle
- Soft and strong perineum & labia
- Modules can be changed quickly and easily
- Water-based lubricant supplied to aid digital examination and use of speculum
- Abdominal wall can be removed quickly and easily
- All components are latex free
- Modules can be easily cleaned to remove lubricant

Abdominal wall lifts off...

The Clinical Male Pelvic Trainer Mk 2 presents key anatomical features, both externally and internally, for teaching ‘hands-on’ male pelvic examination and diagnosis. The uncluttered design of the model enables trainees to focus on essential anatomy and procedure. The Mk 2 model features new and improved pathologies which allow for a realistic and anatomically accurate training experience.

This product has been designed in close collaboration with the staff at the Clinical Skills Resource Centre, University of Liverpool; Imperial College, London; Guys Hospital, London; Southmead Hospital, Bristol; University of Southampton, UK.

Skills Gained:
- Learning examination procedure
- Testicular examination
- Dry catheterisation (Foley catheter size 16 and retrograde catheters)
- Examination of normal anatomy
- Evaluate testicular abnormalities
- Evaluate abdominal / pelvic pain

The genitalia includes the penis (both circumcised and non-circumcised), scrotum, testicles (includes vas deferens and epididymis)

Anatomy of penis:
- glans and shaft normal

Anatomy of groin with clear anatomical landmarks:
- ASIS (anterior superior iliac spine)
- pubic symphysis and tubercles

Anatomy of scrotum area:
- scrotum
- testicles with epididymis and vas deferens

Pathologies of genital area (Advanced model only):
- varicocele (Module 2)
- testicular tumour & penile cancer (Module 3)
- epididymal cysts (Module 4)
- hydrocele (Module 5)
- orchitis/epididymo-orchitis (Module 6)
- indirect Inguinal hernia (Module 7)

The Pelvis has realistic anatomy modelled from CT scan data.

Product Qualities
- Soft tissue inserts are removable and replaceable:
  - genitals (penis, perineum, & testicles)
  - abdominal wall
- Can be used in two positions (standing and supine)
- Skin surface is washable using soap and water
