TPN/IVH Care Simulator

Part No: KKM97

An invaluable teaching aid for explaining central venous catheterization and the proper care of patients receiving Total Parenteral Nutrition (TPN) and Intravenous Hyperalimentation (IVH). It can also be used for patient education.

Skills
• Care of catheter sites including bandaging and dressing
• Fixing and care of feeding tubes
• Management of tubes, skin sterilization procedure and aseptic techniques
• Understanding of relevant anatomy and the path of the central venous catheter

Features
• Life-sized upper torso and neck section
• Includes transparent removable anatomical section showing the structure of the clavicle, sternum, ribs, veins, arteries, heart and upper lungs
• Demonstrates the path of catheters from 3 approaches: subclavian vein, internal jugular vein and supraclavicular
• Heart model can be opened up to show the location of the tricuspid valve

Package supplied
• 1 Male upper torso & neck
• 1 Neck & breast skin
• 1 Transparent anatomical model
• 1 Head supporter

NG Tube & Trach Care Trainer

Part No: LD375-10001

Torso task trainer designed for instruction in the care of patients with respiratory conditions and the practice of gastrointestinal care procedures via nasal and oral access.

Skills
• Tracheostomy care
• Tracheal suctioning
• NG tube insertion and removal
• NG tube irrigation, instillation and monitoring
• Feeding tube insertion and removal
• Gastric lavage and gavage
• Nasoenteric and esophageal tube insertion, care & removal
• Oropharyngeal and nasopharyngeal insertion and suctioning
• Insertion, securing and care of endotracheal tubes

Features
• Head features anatomical landmarks, trachea, esophagus, lungs and stomach
• Lungs and stomach may be filled with fluid for realistic practice of many procedures

Package supplied
• 1 Adult male torso
• 1 Mannequin lubricant
• 1 Tank top
• 1 Carry case
• 1 User manual

Tube Feeding Simulator

Part No: KKMW8

The Tube Feeding Simulator offers effective training for caregivers and medical professionals who work with patients with enteral tube nutrition. The mannequin offers 3 routes for EN tubes and allows training with real liquid foods. Correct placement of the tubes can be confirmed by auscultation and direct observation. A feeding routes panel and a chest sheet to facilitate anatomical understanding come with the model.

Skills
- Feeding tube insertion:
  - nasogastric (NG)
  - orogastric (OG),
  - percutaneous endoscopic gastrostomy (PEG)
- Confirmation of tube placement
- PEG care: tube insertion in and setting the balloon
- Administration of liquid food

Features
- Compact and portable
- Flexible neck allows for appropriate neck/head positioning
- Tube placement can be confirmed by auscultation
- Transparent chest enables direct observation of procedures
- Can be set at Fowler’s position
- Stomach accepts up to 300cc of liquid

Package supplied
- 1 Male torso and support base
- 1 Drain tube
- 1 Funnel
- 1 Plastic cup
- 1 Tube feeding routes panel
- 1 Chest sheet
- 1 Instruction manual
